

Our Mission:

We make a difference in the lives of children, adults, and seniors by making living spaces usable and fully accessible. We do this by being on the leading edge of training and education, doing what we say when we say we will do it, and keeping your home clean and safe with as little disruption to your daily life as possible. Our employees are highly respected and respectful, expressing themselves in their work while providing for their families and giving to the community.

Dan has always been happy to help and to spend the time necessary to explain the process, when helping families with their home modifications needs. He is professional, friendly, and timely. Accessibuilt gets the job done well, and they communicate with people professionally.

Home Remodeling for Accessibility

Ask Yourself:

Am I unsteady getting in and out of the bathtub?

Are the doors in my home too narrow to get through?

Would a ramp or grab bar make my life easier and safer?

Are friends or family unable to visit because my home is inaccessible?

If you have found yourself unsteady, or unable to get around your home like you once did, or if you are a family member or care-giver who is concerned about the comfort and safety of a loved one, then now is the time to consider making your home safer. We do it all, from a grab bar in the shower, to complete home renovations.

- **Bathroom accessibility**
Walk-in or roll-in showers, grab bars, ADA commodes, and other specialty assistive devices.

- **Kitchen remodeling and accessibility**
Includes cabinets, countertops, and appliances.
